Subject: First Demo Meeting Notes

Date: 2/6/2019

The purpose of this memorandum is to inform you of some modifications suggested during our meeting with Ms. Larsen. In order to best integrate these changes into our system, we will be open to discussing their implementation with the guidance team. Please contact us if you have any further questions or would like to set up a meeting.

The changes suggested are as follows:

Workflow
1. Add option to condense tabs.

Directory Configuration
2. Display what was and what wasn't ingested, possibly on two separate panels.

Log File Configuration
3. Don't indicate each error by line number, do errors per file instead

Log Entry Configuration
4. Double click editable text input for vector instead of drop down.
5. Vector inputs should be pre-populated

Change Configuration
6. View graph link inside of the graph boxes that opens when clicked.

Node Configuration in Graphical Format
7. Add default intervals such as Seconds, Minutes, Hours. Etc.

Relationship Configuration
8. Relabel to Node 1 and Node 2 the columns for edges.

Everything that was not mentioned can be assumed to require no further changes at the moment.
